[ayushtandon7.github.io](https://ayushtandon7.github.io)  
Salesforce Trailblazer

Salesforce and CTI Engineer with 6+ years in IT services and consulting, specializing in Salesforce development, administration, automation, and contact-center technology. Experienced across Sales Cloud, Service Cloud, Experience Cloud, Data Cloud, Talkdesk, Genesys, and Amazon Connect, with a focus on scalable routing, secure integrations, and operational automation.

## EXPERIENCE

### Salesforce and CTI Engineer · Enpal

Apr 2025 — Present · Berlin

- Build and deploy Salesforce solutions across Sales, Service, and Experience Cloud using Flows and Apex.
- Designed end-to-end Talkdesk CTI solutions covering IVR, call flows, routing, ring groups, data dips, and business-system integrations.
- Consolidated 80+ phone numbers and multiple ring groups into a scalable routing architecture.
- Rolled out AI transcription and summaries, mobile CTI, and Airtable integrations while onboarding 1,000+ users.
- Implemented SAML SSO with Microsoft Azure AD and a centralized Make.com integration architecture.
- Designed and deployed Talkdesk–Azure middleware for recording retrieval, audio transcription, OAuth token handling, and authenticated API delivery.
- Support technical interviews, release management, documentation, and stakeholder collaboration.

### Senior Salesforce Analyst · Accenture

Jul 2021 — Mar 2025 · Bangalore

- Translated business requirements into user stories and acceptance criteria in Jira and ServiceNow.
- Configured objects, validation rules, Flows, permission sets, and profiles across Sales, Service, and Experience Cloud.
- Maintained and supported multiple Salesforce applications and aligned technical delivery with business goals.
- Built Automation Anywhere 360 automations for Salesforce, Outlook, and ServiceNow.
- Delivered Dynamic Picklist, Audit Automation Tool, and User Clone Tool packages used across multiple orgs.

## SELECTED PROJECTS

### Talkdesk–Azure Middleware

Designed the Make.com integration from architecture through deployment: webhook intake, OAuth client credentials and token caching, recording retrieval, audio transcription, payload normalization, and authenticated Azure API delivery.

### Audit Automation Tool

Automated Salesforce audit-log review with more than six months of retained history, configurable alerts, and tagging for change requests, tasks, and incidents.

### Dynamic Picklist

Enabled business users to manage Salesforce picklist values without monthly releases, configuration changes, or recurring IT requests.

### User Clone Tool

Streamlined user setup by cloning permission sets, public groups, queues, and profile assignments in a consistent workflow.

## CREDENTIALS

- Salesforce Accredited Agentforce Manufacturing Professional
- Salesforce Certified Platform Administrator
- Salesforce Certified Platform Developer
- Salesforce Certified Agentforce Sales Consultant
- Superbadge: Data Protection
- Selling with Sales Cloud Specialist
